UAE E-INVOICING MANDATE

Migrate to E-Invoicing.

Be compliant before the mandate hits — **without throwing away the accounting software you already use.** Standard Books makes every invoice FTA-ready, automatically.

● Peppol PINT AE ready

● Works with your existing software

● AI-powered suite

UAE E-INVOICING — WHAT'S COMING

Every invoice. Electronic. Reported to the FTA.

The UAE Ministry of Finance is rolling out a nationwide e-invoicing mandate. Invoices will no longer be PDFs or paper — they become structured electronic documents, exchanged through an accredited network and reported to the Federal Tax Authority.

Phased rollout from July 2026

B2B and B2G invoicing goes electronic in phases, per Ministry of Finance announcements. Businesses are expected to be connected through accredited service providers.

Peppol “5-corner” model

Invoices travel in the **PINT AE** format between accredited access points — from your system to your customer's, with the FTA receiving the tax data.

Non-compliance is not an option

Invoices that don't comply may be rejected by your customers' systems — delaying payments and exposing you to penalties.

ARE YOU READY? — QUICK CHECK

- ✓ Can your software produce **PINT AE** structured invoices?
- ✓ Are invoices archived and auditable for FTA inspection?
- ✓ Is every TRN, tax code and line item validated before sending?
- ✓ Will your VAT return reconcile with what the FTA already received?

If any answer is “no” or “not sure” — this brochure is for you.

● Structured, validated invoices

● B2B & B2G covered

● FTA reporting built in

● Full archive & audit trail

ALREADY HAVE ACCOUNTING SOFTWARE? PERFECT.

Keep your software. We add the e-invoicing.

You don't need to migrate, retrain your team, or lose years of data to become compliant. The **Standard Books E-Invoice Connector** sits alongside whatever you use today — Tally, QuickBooks, Sage, Excel invoicing, or a custom / legacy ERP — and turns its invoices into fully compliant UAE e-invoices.

HOW IT WORKS

1 Connect

We read invoices straight from your current system — database, export file, or even printed-invoice data. No changes to how you bill.

2 Convert & validate

Every invoice is mapped to the Peppol PINT AE format. TRNs, tax codes and totals are validated *before* anything is sent — errors are caught, not transmitted.

3 Comply — automatically

Compliant e-invoices are exchanged and reported, archived with a full audit trail, and summarized in a live compliance dashboard.

⚡ Works with what you have

Tally · QuickBooks · Sage · Zoho · Excel invoicing · custom & legacy ERPs · even our competitors' POS systems.

Zero disruption

- ✓ No data migration, no downtime
- ✓ Your team keeps billing the same way
- ✓ Go compliant in days, not months

When you're ready for more...

Upgrade to the full Standard Books suite at your own pace — your e-invoicing setup carries over untouched.

BUILT FOR EVERY BUSINESS

● Supermarkets & retail

● Restaurants & cafés

● Trading & distribution

● Typing centers

● Contractors

● Freight & logistics

● Salons & gyms

One connector. Any accounting software. Full UAE compliance.

ONE PLATFORM — NINE PRODUCTS

A complete suite.

Every module e-invoice ready.

Whatever your business, there's a Standard Books product built for it — POS, back office, full accounting and AI in one system. Every invoice from every module is born compliant.

SB Retail

Supermarket & retail POS + ERP. Barcode, scale, wholesale pricing, live P&L.

SB Dine

Restaurant ERP — table to kitchen (KOT) to books. Recipe costing & menu engineering.

SB Serve

Gym, salon or laundry — one switch. Appointments, memberships, order tracking.

SB Parts

Auto spare parts. OEM cross-reference, vehicle fitment, multi-currency billing.

SB Docs

Typing centers & PRO offices. Govt-fee wallets, job workflow, per-job profit.

SB Cargo

Freight & logistics. Air / sea shipments, waybills, tracking, customs docs.

SB Project

Contracting ERP. Cost centers, progress billing, retention, live WIP.

SB Voice

AI voice POS — speak the order, the invoice is ready. Multilingual.

SB Vision

AI surveillance — theft alerts, people counting, camera events matched to bills.

AI inside everything — copilot, nightly self-audit, forecasting, plain-language journal entries.

EN · AR RTL

Not ready to switch? Keep your current software and add the E-Invoice Connector — see page 3. Move to the full suite whenever you're ready.

FROM WHERE YOU ARE — TO FULLY COMPLIANT

Your migration journey.

Five steps. Days, not months.

1

Free readiness assessment

We review your current invoicing — software, formats, TRNs, volumes — and give you a written gap report.

2

Choose your path

Connector (keep your software) or **full suite** (move to Standard Books) — or start with one and grow into the other.

3

Map & connect

We map your items, customers and tax codes to PINT AE, connect the data source, and configure validation rules.

4

Test with real invoices

Parallel run: your live invoices are converted and validated until every document passes — before go-live.

5

Go live — and stay supported

Compliance dashboard, alerts, VAT reconciliation — with local support from Deira, in English and Arabic.

LOCAL SUPPORT

Working software, not theory

A full suite of products already
running in real businesses.

Local — Deira, Dubai

Walk in, call, or have us visit.
Support in English & Arabic.

AI every day

We build AI-powered systems daily
— your agents included.

DON'T WAIT FOR THE DEADLINE

E-Invoicing? Ready.

Book your **free e-invoice readiness assessment** — we'll show you exactly what the mandate means for your business, and the fastest way to be compliant.

Free readiness assessment & live demo

See your own invoices converted to PINT AE — in front of you.
